OVERVIEW

I build **reliable, scalable web and mobile applications**, with deep experience in **AI integration and Retrieval-Augmented Generation (RAG)**. Since 2020 I have shipped internal tools, dashboards, reporting automation and digital record systems for healthcare, workforce analytics and large-scale logistics. Whether you are starting from scratch or improving an existing product, I turn your idea into a working solution that meets your business goals, with **clean code, clear communication and on-time delivery**.

HOW I CAN HELP

Web applications
Responsive, high-performance apps from frontend to backend.

Mobile apps
Cross-platform apps with clean UI and solid architecture.

E-commerce
Custom stores, payment integration and conversion-focused features.

AI solutions
RAG systems, AI chatbots, document Q&A and LLM integration.
